

# Know it all

## NavLogix™ delivers all you need to know about your fleet in real time

It's easy to keep up with all the vehicles in your fleet when you know it all. And you can—with NavLogix from GE Security. NavLogix is a Mobile Resource Management (MRM) system that combines GPS, cellular and web hosting technologies to give you real-time locations, start and stop times and detailed reporting with alerts for any vehicle in your fleet—nationwide.

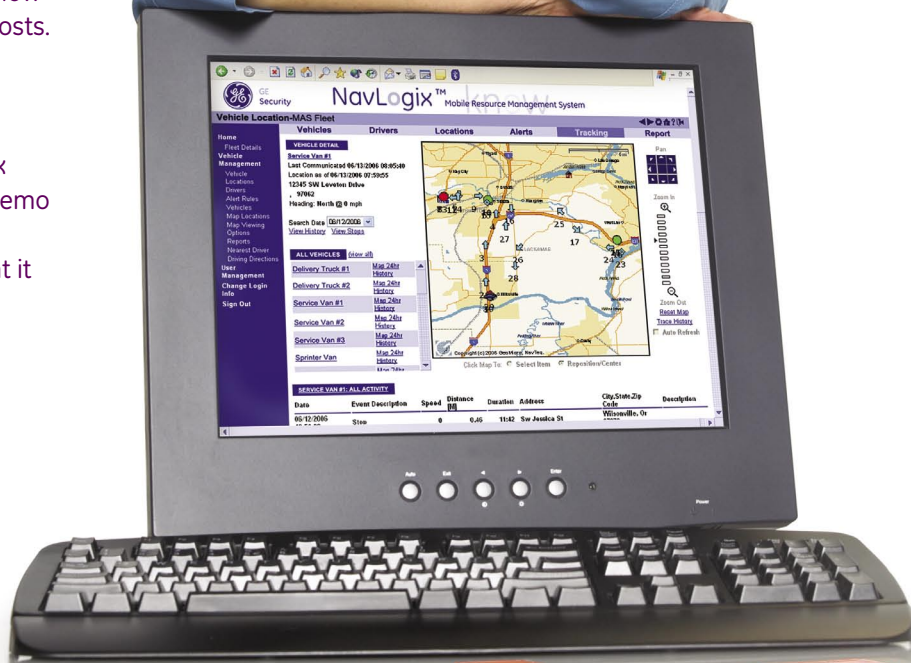

With that knowledge, you can quickly dispatch the nearest driver, enhance fleet efficiencies and receive alerts for speeding and excessive idling, so your drivers use less fuel and reduce your operating costs. Plus, real-time tracking helps you protect your vehicles from theft and unauthorized use.

Just as important, NavLogix is economical, with a low monthly per-vehicle subscription and no startup costs. So it's easy to fit into your budget.

### Take NavLogix for a FREE 30-day test drive

Put yourself in the know—FREE—with the NavLogix 30-day test drive. Register online to receive your demo unit and user account with access to all NavLogix functions. Take NavLogix for a spin, and you'll want it for your fleet.
